

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

FOREWORD

THE AMERICAN BAR is a biographical directory of lawyers of the highest class in all the states of the Union and in the various cities and important towns of each state, including also those of the larger cities of Canada.

The work of gathering special information concerning the character and standing of lawyers for use in preparing this book has occupied more than two years' time, and has been done through personal investigations made by our traveling representatives, and by means of correspondence with thousands of local authorities, including especially lawyers themselves, bar association officials, bankers, and others. As to the eligibility of members of the bar in each locality our inquiries were directed not merely to the question of legal ability, but also particularly to that of reputation for integrity of character, and in arriving at our conclusions we have been guided by the general consensus of opinion of the best available authorities.

Necessarily, lawyers named in this work must be considered as having been classified in accordance with the usual standards recognized in the localities respectively where they reside and practice their profession.

In preparing this work of reference for general and practical use in the legal and business world, it has been deemed wise to include law firms as a whole in all cases where the general reputation of the firms justified their selection, without attempting to distinguish in any way between the individual members composing them.

The names of some lawyers have been included without personal sketches for the reason that up to the time of going to press the necessary data had not been received. Doubtless there are lawyers, whose names will not be found in this book, who are entitled by reason of their attainments and character to be included in it, but who have been omitted because of failure on their part or that of their friends to submit to the publishers sufficient information concerning their record and standing. As this book is to be an annual publication, we shall hope to correct in the next edition errors of omission as well as any others that may have occurred in the preparation of the present edition. To this end we invite suggestions from members of the profession and others who may be interested. It is our aim and steadfast purpose to make this work representative of the very best elements in the legal profession in America, and this can be accomplished only through the friendly co-operation and aid of members of the bar themselves in the various localities throughout the country.

The data given in very brief form after the name of each lawyer include important facts concerning his life history, which are of interest and value as throwing light upon his preparation for his life work, the character of his practice, and his achievements so far as they may be indicated by public positions held by him at any time. These condensed sketches contain nothing eulogistic, but are strictly confined to a plain statement of facts. The information given has been obtained in nearly every instance by direct inquiry of those concerned.

Under the name of each city or town will be found the name of a bank, and in the larger cities there are given the names of the president and the cashier of the bank, together with some bank statistics having a bearing on the size and importance of the institution. The names of banks have been inserted for the convenience of the users of this directory who may desire

special information about local matters, which a bank is best equipped to furnish, or who may have occasion to transact some banking business in connection with their legal affairs.

THE AMERICAN BAR covers an entirely new field among professional publications, and at the same time meets an old want. It is a work of reference for the everyday use of members of the legal profession and business men of all classes who may have legal matters of importance, the management of which frequently must be entrusted to lawyers residing and practicing in more or less distant sections of the country. In all such cases, this work will be a great aid to those who consult it, because it furnishes the names of lawyers of the highest class in each community, and in addition gives information about them which should be an important and perhaps decisive factor in determining upon the selection of counsel.

The names of lawyers and law firms mentioned in this directory are arranged alphabetically under the names of cities and towns, respectively, where they reside and practice. Cities and towns in each state are also placed in regular alphabetical order, and figures following the name indicate the population. An asterisk (*) after the name of a town or city indicates that it is a county seat.

No charge has been made and no payment will be accepted for the insertion of the name of, or personal data concerning, any lawyer or law firm in this book.

In conclusion, we wish to extend heartfelt thanks to the many members of the bar in every state, to bank officials and others who have given so generously of their time and attention in order to help make this book absolutely dependable.

Minneapolis, September, 1918.

JAMES CLARK FIFIELD.

ALABAMA

Capital, MONTGOMERY

ABBEVILLE*, 1,141, Henry Co.
First National Bank

MILLER, R. W.
Born 1862; a. to bar, 1892.
